

Investor Summary

Clinical-Stage Precision Medicine | Non-Hormonal | First-in-Class

2026 | Confidential

COMPANY OVERVIEW

EndoCyclic Therapeutics, Inc. is a clinical-stage precision medicine company in Irvine, California. Led by founder and CEO Dr. Tanya Petrossian, PhD, the company is developing first-in-class, non-hormonal therapeutics and diagnostics for endometriosis and oncology using a proprietary precision peptide platform with pH-mediated activation.

The platform enables selective uptake by diseased tissue via a proprietary endocytic pathway, designed to act only in diseased tissue while avoiding hormones, surgery, and systemic toxicity. EndoCyclic is a founding member of the Milken Institute Women's Health Network.

\$200B

US economic burden

190M+

Women affected

IND Allowance

FDA milestone

Perfect "10"

NIH grant score

MARKET OPPORTUNITY

- \$180B-\$250B global market potential for endometriosis treatments (McKinsey estimate)
- 10% of reproductive-age women globally - 190M+ affected, leading cause of infertility and chronic pelvic pain
- \$200B annual economic burden in the United States
- 8-year average diagnostic delay

THE CARE GAP:

Current therapies are largely hormone-based and symptomatic; they do not eliminate lesions or modify disease biology.

CLINICAL PIPELINE

PROGRAM	INDICATION	STAGE	KEY DIFFERENTIATOR
ENDO-205	Endometriosis therapeutic	Phase 1	FDA IND Allowance (2026); first-in-class, non-hormonal, short-course, disease-modifying precision peptide therapeutic
FemLUNA(TM)	Endometriosis imaging	IND-enabling	Targeted imaging agent capable of detecting superficial and sub-millimeter lesions often missed by current imaging
ENDO-995	Malignant solid tumors	Pre-clinical	Investigational tumor-selective, non-hormonal therapeutic peptide
ENDO-311	Solid tumor diagnostics	Pre-clinical	Investigational targeted imaging agent paired with ENDO-995

MILESTONES & VALIDATION

- > FDA IND Allowance achieved for ENDO-205 (2026); Phase 1 first-in-human clinical study
- > NIH perfect score of 10 on a Commercialization Readiness Pilot grant
- > Multiple NIH awards from NICHD
- > Recognized as an NIH SBIR Success Story
- > Fast Track filing underway
- > No dose-limiting toxicities observed in GLP toxicology studies (preclinical)
- > NIH-backed, with UCLA partnership, RADx Tech validation, and White House recognition
- > Founding member, Milken Institute Women's Health Network

LEADERSHIP

Tanya Petrossian, Ph.D. - CEO, Founder & Inventor

UCLA Biochemistry; 15+ years peptide therapeutics; LA Entrepreneur in Residence; Biocom Catalyst Award

Melanie Hartsough, Ph.D. - Nonclinical Toxicology

Former FDA reviewer (CBER/CDER); President, American Board of Toxicology

David Lin, Ph.D. - CMC

27+ years pharma regulatory; former FDA acting Division Director (CDER)

Andrea Lukes, MD - Clinical Affairs

Board-certified OB/GYN, FACOG; 90+ clinical trials in women's health

Aileen Ryan, MS - Regulatory Affairs

40+ years regulatory; former Bayer Pharma, Ludwig Institute

Miganush Stepanians, Ph.D. - Biostatistics

Ph.D. Statistics (BU), M.S. Math (MIT); 20+ successful NDAs/MAAs

Frank Fernandez - CFO

Decades of financial leadership in life sciences

INVESTMENT THESIS

Clinical-Stage Lead in a \$180B-\$250B Market

ENDO-205 is a first-in-class, non-hormonal precision peptide therapeutic with FDA IND Allowance (2026), now in Phase 1. It is designed as a short-course, disease-modifying treatment for endometriosis.

Regulatory and External Milestones

FDA IND Allowance, a perfect NIH grant score of 10, multiple NICHD awards, and NIH SBIR Success Story recognition mark the path into clinical-stage development.

One Platform, Four Precision Programs

The proprietary precision peptide platform spans ENDO-205 and FemLUNA for endometriosis, plus the ENDO-995 therapeutic and ENDO-311 diagnostic pair for oncology.

Significant Unmet Need

Endometriosis affects more than 190 million women worldwide, carries a \$200 billion annual economic burden in the United States, and takes an average of eight years to diagnose.

Founder-Led Development Team

Founder and CEO Dr. Tanya Petrossian leads expertise across nonclinical toxicology, CMC, clinical affairs, regulatory affairs, biostatistics, and finance.

WHY NON-HORMONAL MATTERS

CURRENT STANDARD OF CARE

- Largely hormone-based
- Primarily symptomatic
- Does not eliminate lesions
- Does not modify disease biology

ENDOCYCLIC APPROACH

- + Non-hormonal precision peptide mechanism
- + Designed to eliminate lesions and modify disease
- + Short-course, disease-modifying treatment
- + Designed to avoid hormones, surgery, and systemic toxicity
